Stamford, Conn.

**Fall Catalogue of  
Hardy Herbaceous  
Plants.**

1901.

---

FOR THE TRADE ONLY.

# To the Trade...

We desire to call attention to the prices in this catalogue, and believe that quality of stock considered, they will be found as low, if not lower than those offered by other firms. As will be noticed we divide our herbageous plants into two classes, namely, pot-grown and field-grown. Varieties that clump up readily are grown in pots, while those that require more room for development are planted in the field. Practically there is little or no difference in the quality of stock, and but a very small difference in the price. Owing to pot-grown plants being carried over winter in cold frames, we suffer no loss whatever. We are consequently enabled to offer these at a slight reduction. We have on hand 300,000 plants for immediate shipment, ten acres of which are planted in field-grown stock, and the balance utilizing ten thousand feet of glass in cold-frames. Prices are made subject to stock being unsold upon receipt of order.

## **TERMS.**

Parties unknown to us will kindly send cash with the order. To parties of approved credit, bills will be due and payable 60 days from date of invoice. Where special terms are wanted, we should be pleased to accede to any reasonable demand.

## **WHEN ORDERING.**

Please give full name and address, as many letters reach us lacking either one or both. Kindly allow us a reasonable time to fill your order, and then if you do not hear from us, it may be assumed that we are unable to find you.
